### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

While EP document no. 0842836 to Taniguchi et al disclose a system for controlling vehicle-movement dynamics, which operates by means of the braking system and the drive train of a vehicle in order to prevent lateral breakaway of the vehicle, a braking moment being produced by means of the braking system, on the front wheel outside of the bend, and an additional drive moment being built up, by means of the drive train, on the driven wheels, for the purpose of preventing oversteering of the vehicle, wherein a higher-order or lower-order drive slip control means comes into action if the slip on one or more of the driven wheels exceeds a predetermined value due to the additionally built-up drive moment, and wherein the braking moment is first produced on the front wheel on the outside of the bend, Taniguchi et al do not disclose that the additional drive moment is built up on the driven wheels ONLY IF the oversteer of the vehicle does not decrease after a predetermined period of time. In other words, the reference does not disclose incorporating a time delay for a certain period of time to ascertain whether the driving behavior is stabilized solely on the basis of the additional drive moment built up on the driven wheels. It is for this reason that applicant's invention defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
